Job experience

07/2022 - still   Self employed (freelancing)

Software development, web apps development, IT consultant

2010 - still   BlueNet.cz (formerly PhoenixDesign.cz)

Software developer, Project manager - my job is to design and develop applications and ISes, UI prototyping and also project management *(family business - associate)*

(from 2010 to 2016 we have worked under Naše Dobroty brand, then we switched to PhoenixDesign and lastly to BlueNet.cz)

2017 - 2022   Office of Labour of Czech Republic, regional branch Ostrava

During my programming break (not programming full time) I made decision that I want to help people. In the beginning as Career specialist then as Specialist of social benefits at Office of Labour of Czech Republic

2016 - 2017   Česká Spořitelna

In this time period I have temporarily left my full time career as IT specialist and started to work as bank advisor - specialist of financial products *(I had certification of Czech national bank - expired)*

2013 - 2014   Seznam.cz, a. s.

Analyst of machine processed data *(details can not be provided - signed agreement of confidentiality; alongside with studies)*

2012 - 2014   Self employed (freelancing)

Software development, web apps development, IT consultant *(alongside with studies)*

Education

Moravská vysoká škola Olomouc

At MVŠO I studied **Business economics and management**. At 2021 I graduated with honors and achieved Bachelors title.

Palacky university in Olomouc

At UPOL I studied **Applied Informatics**. The study was very beneficial from the point of view of algorithms and mathematics. I learned to program in C, C ++, C # and several other languages.

Grammary school at Bruntál

I graduated from IT, math and english

IT skills

PHP	HTML5	CSS3

Sass	JS ES6	Relational databases
Figma prototyping	MySQL	UI a UX designing
React	C/C++	UnrealEngine
Kotlin	Network managament	

General skills

Presentation and communication skills	MS Office	OS Windows, Linux
Data processing/analysis	Image and video processing	

Languages

English
Fluent in words and writing *(I plan to get a C1 certificate, ideally a C2)*

Czech
Native speaker

Licenses and certificates

Drivers license - group B (Czech drivers license)

Google Apps certificate
I obtained this certificate during my time in the Česká Spořitelna.

Google Analytics Academy
Google Tag Manager certificate.

About me

I have been developing web applications and information systems for over ten years. Most of the time I worked as a full stack developer with orientation on PHP and SQL on the server side. On the frontend I worked for a long time without any frameworks, only in HTML, CSS (or Sass) and JavaScript.

In PHP, I programmed my own MVC for our family business. Also I have made a JS library similar to jQuery, which, however, always processes data as an array and is significantly smaller (easy to use built-in methods for arrays).

I am now working on the transition to Frontend. I was fascinated by the React framework, so I decided to specialize in it. In addition to React, I am interested in NoSQL application solutions (MongoDB).

After ending my studies at UPOL, I felt the need to change the environment, so for some time I only worked only part-time in IT. I did programming after my job and in my free time, I worked mainly on projects that I enjoyed and for our small family business.
